Progress Report - **Project 23**

Giuliano Rasper **2568405**, Jessica Werner **2563327**,
Stephan Ariesanu **2565385**, Muhammad Kamran **2572847**,
Alexander Dincher **2563446**, Simon Fedick **2563209**

- Week 05 -

Progress

We began working on a UML class diagram to the point where we found reasonable class structures for each main task (Agenda, Documents, ...), but yet we have to combine most of it in an efficient manner. Furthermore, we began implementing and already applied customer feedback to the User Interfaces.

Problems

There were no issues this week.

Achievements

We have submitted paper versions of our presented prototypes that we didn't have to change much due to the customer being very pleased with them.

Team Members

All (together as team) -

Giuliano Rasper Impelemted Java Communication Base (2h). Read throught JavaScript Docs and examples since I have no JavaScipt experience yet. Looked into JavaScript WebSocket usage and built a rough communication structure (3h). Worked on the UML class diagram (around 1 hrs).
Jessica Werner Worked on the UML class diagram (around 6 hrs).
Stephan Ariesanu Worked on the UML class diagram (around 6 hrs).
Muhammad Kamran make some changes in the website prototype suggested by Timo (Approx. 2.5hrs) and Created GUI website prototype file(pdf) with description (Approx. 30minutes)
Alexander Dincher Helped Muhammad Kamran to adjust, design and combine both website prototypes (3h). Built first structure for the database system

with interfaces and abstract classes (1,5h). Designed draft for AdminGUI design to include in Frontend-prototype (2,5h).

Simon Fedick Worked on the UML class diagram (around 6 hrs). Converted the Admin GUI prototype to a paper prototype in pdf format (around 20 min).
